I don't see why you can't delete EL-2 (the one with problems).

Gregg,

Although I am not supposed to be able to check the operator's approval, I was able to check both boxes for 2-413 and it is now loaded into the database.

The tritium sample/value for the Sept 18 sample for EL-2 is already in the database. If I delete the entry from the pipeline, that problem should terminate - any reason not to delete it?.

Greg, I can't find my copy of the lab sheet, so please send a new one

Jim,  
2-413 doesn't give me an error, but it doesn't give me the 'yellow bar' to upload either. I think you have to check it on your end.

EL-2 indicates a duplicate lab ID. I checked the lab sheet and it is currently correct. I can't find the duplicate number, but I sent you the lab sheet on 7/3/08. Again, unfortunately I think it needs to be fixed on your end because I can't find the problem. Can you do a query on the sample ID (2448.03) and see where the duplicate is? The numbers are on the lab sheet sent to you on 7/3/08. Let me know if I need to resend the lab sheet.

Gregg
